Evaluation Web

Local Use Fields – L1 and L2

----- Rapid Test at Non-Treatment Site -----

If the testing site (first site) is **NOT** a Rapid Rapid Testing Site, use Alere Determine as the first Rapid HIV test and confirm the positive result by sending the client to a Rapid Rapid Testing/Treatment site (second site) which will perform a second Rapid test and link any positive client to treatment within the same or next business day.

To Do Checklist --- Mandated by DHSTS:

- ✓ First site is responsible in collecting the data of the first test and the second test in the HIV testing form (Evaluation Web HIV TEST TEMPLATE) and also entering the data into Evaluation Web. Documenting and reporting the HIV testing data is **ONLY** required by the first site.

*****NJ EVALUATION WEB HIV TESTING TEMPLATE*****

NJ-Local Use Fields: (Refer to the labels for local use fields on Page 3)	L1						
	L2						

Labels for Local Use Fields only by NJ	
L1 (Local Use Field 1) — Site ID of the second testing site	L2 (Local Use Field 2): — Worker ID of the second testing site

*****EVALUATION WEB SYSTEM*****

Local Use Field 1 - Site ID of Second testing site:	<input style="width: 100%; height: 100%;" type="text"/>
Local Use Field 2 - Worker ID of Second testing site:	<input style="width: 100%; height: 100%;" type="text"/>

- ✓ Second Site is responsible for promptly sending the second test information on the NJ HIV POSITIVE TRACKING FORM back to the first site, and linking the client to care.
- ✓ First site is responsible for mailing the Evaluation Web HIV TEST TEMPLATE Pages 1, 2 and 3 to the Surveillance Unit with complete information.

Not To Do --- Mandated by DHSTS

- ✗ Second Site should **NOT** collect the data on the HIV testing form or enter the data into Evaluation Web
- ✗ First site should **NOT** avoid mailing the completed HIV testing form to Surveillance Unit
